

University of Pennsylvania
Math 1300 Introduction to Calculus Summer II 2023

Instructor: Andrew Kwon

Email: akwon@sas.upenn.edu

Office: DRL 3N2C

Office Hours: M, W, F 5-5:30pm, T, Th 2-4pm, or by appointment

Course Objective: Understand and apply the concepts found in an introductory calculus course: limits, differentiation, and integration.

Class: Lecture will meet three times a week on Mondays, Wednesdays, and Fridays from 12:00pm-2:30pm. Lecture attendance will be taken and will be used when a student's grade ends up on the cutoff between two different letter grades. It is very important that students attend and participate in lecture.

Course Webpage: See the Canvas course page. We may also use tools such as Slack or Discord to facilitate discussion.

Text: There will be no required text for the course, but several other resources (books, videos) will be made available to students.

Homework: (50% of final grade) There will be weekly homework assignments, uploaded to Canvas on Saturday and due the following Friday in-class. These are meant to familiarize students with a variety of problems.

Quizzes: (25% of final grade) There will be weekly quizzes, starting July 7. These are designed to show students areas to prioritize for study.

Exams: (25% of final grade) There will be one cumulative final exam on the last day of lecture. No calculators will be allowed, but one sheet of handwritten notes may be used.

Calculators: Using a graphing calculator is forbidden in this class.

ADA Compliance: The Office of Student Disabilities Service (SDS) is part of the Weingarten Learning Resources Center. It provides exams and assistive technology (along with many other services) to students that self-identify in compliance with Section 504 of the Rehabilitation Act and the Americans with Disabilities Acts. Please see their website (<https://weingartencenter.universitylife.upenn.edu/disability-services/>) for more information. This most often takes the form of students that require extra time to take an exam taking the exam at the Weingarten Center.

Code of Academic Integrity: The following is from the University's website on academic integrity. "Since the University is an academic community, its fun-

damental purpose is the pursuit of knowledge. Essential to the success of this educational mission is a commitment to the principles of academic integrity. Every member of the University community is responsible for upholding the highest standards of honesty at all times. Students, as members of the community, are also responsible for adhering to the principles and spirit of the following Code of Academic Integrity found here: http://www.upenn.edu/academicintegrity/ai_codeofacademicintegrity.html. If a student is unsure whether their action(s) constitute a violation of the Code of Academic Integrity, then it is that student's responsibility to consult with the instructor to clarify any ambiguities."

Get help: Before it's too late, please seek out help. The hardest part of the course is keeping up with the pace.

1. Ask lots of questions in lecture.
2. Instructor's office hours.
